

Technical Data

MD-2009NB : Anti Blooming Agent

MD-2009NB is a solvent based anti blooming agent. Effective to clean and prevent rubber outsole from blooming or solidifying.

Application

In usage MD-2009NB can be applied directly onto the rubber, apply this product to bloomed or solidified rubber surface until the white spot dismissed from rubber. Let it dry at the room temperature and keep rubber outsole properly.

Physical Properties

Appearance	: Colorless, clear
Specific Gravity (at 25 ^o C)	: 0,75 – 0,95 g/mL
pH	: 6,0 – 8,0
Viscosity (at 25 ^o C)	: 1 – 10 cPs
Solubility in water	: Insoluble
Shelf Life	: 1 year
Application	: Anti blooming agent

Packing

25 L / 125 L / 200 L net weight of plastic containers

Health and safety information

- Classification and labeling according to regulations for transport and for dangerous substances
- Protective measures for storage and handling
- Measures in case of accidents and fires
- Toxicity and ecological effects is given in our material safety data sheets.
